Boerne ISD

School Quality Survey FAQ

Q: What is the School Quality Survey?

A: The School Quality Survey is designed to gather opinions of district schools and their learning environments. We want to understand what our schools do well and how we can improve them, so they can better serve you and every member of our educational community.

Q: What topics are included in the survey?

A: Survey questions address perceptions of school quality, student and academic support, safety and behavior, school leadership, and family involvement.

Q: Who is being asked to participate?

A: All Boerne ISD school staff members — teachers, paraprofessionals, administrators, custodians, food service managers, and classified staff — are invited to participate in the survey.

Q: How was the survey created?

A: District leaders worked with K12 *Insight*, our independent research partner, to develop the survey. K12 *Insight* will also administer the survey and compile the results.

Q: Why should I participate?

A: Student success doesn't happen in a vacuum. Substantive school improvement is a team effort — one that starts with listening. District leaders understand the importance of feedback and have made it a priority to listen to our educational community, especially staff members who work in our schools every day. Only by listening can we begin to make changes that will benefit all our students, employees, and families.

Q: When will the survey be available?

A: The survey will be open October 22 through November 20, 2019.

Q: How will the survey be administered?

A: K12 *Insight* will email invitations with unique survey links to school staff members and parents. K12 *Insight* will automatically generate reminders for people who have not participated. Students ill be able to take the survey by using their student ID to log into the survey landing page.

Q: Can Boerne ISD see my responses?

A: No, all responses are strictly confidential. No one in Boerne ISD or your school will be able to connect you to your responses. The final reports will share only overall results.
