

# Boerne ISD Summer Math Practice

Students who are enrolling in an honors math class are strongly encouraged (NOT required,) to complete the summer study work below. The summer packet will NOT be taken as a grade, but all material covered in the packet will be assumed to be mastered knowledge.

The purpose of the packets is to help you review and reinforce concepts and skills necessary for Honors Math. Completion of the packet over the summer will be of great value to helping you successfully meet the academic challenges awaiting in Honors math next year.

**Instructions:** Complete all sections of the packet. You will show or turn in the completed packet to your Honors teacher the first day of school. All work must be shown and final answers should be circled. Students must show work that supports their understanding. It may be necessary to seek assistance on some questions/concepts... that is fine!
